Re: EMF Solidarity with the workers at GM Sao Jose dos Campos workers, in Brazil, fighting against reduction of rights

Dear Colleagues,

The GM Sao José dos Campos workers (Sao Paulo, Brazil) are facing a major attack of the company. GM management is looking to impose a series of measures that represent reduction of rights and wages in its plant in the city. The company official speech announces creating 600 jobs, but, actually, GM wants easing the journey of work and adoption of lower wages for workers who are hired from now on. The campaign of GM, business sectors and the media wants to impose on the union to accept this unacceptable agreement. We ask for the solidarity of all the companions of this network. The GM wants to further increase its profits at the expense of even greater exploration on the workers.

Send your solidarity to the struggle of workers

GM's Sao Jose dos Campos for the emails:
