

11th February 2009

In solidarity with colleagues in Germany and in defense of work in Europe.

The Section of EDS group of Comisiones Obreras (CCOO COMFIA) expressed its solidarity with the workers at EDS and HP in Europe and the mobilizations in defense of their jobs. In particular we support the actions taken today, February 10th at EDS / HP locations in Germany.

The manpower reduction provided by HP / EDS in all European countries means that one every four jobs is at risk in Europe.

Such a reduction of labor entails dangerous levels of stress among workers and jeopardizes the necessary quality of service provided to customers and thus the business of this company.

We plead for dialogue solutions and the necessary defense of the human factor. In a company like this the main value comes from the people.

A good company is a company that creates jobs, not who replaced the quality jobs by others with poorer working conditions.
