

T&D activities

Superior products, comprehensive services and tailor made solutions in all market segments

Electricity is our business. We have over 100 years of expertise and dedication in bringing power to people worldwide. From rural electrification to turning the wheels of industry and facilitating the trading of energy, we bring power to our customers' projects. AREVA T&D offers its customers superior products, comprehensive services, tailor made solutions in all market segments.

Our products systems serve to transmit and distribute electricity, ensure the reliability, quality and safety of energy flows, as well as operate efficient networks through information management:

- High voltage & medium voltage switchgear, transformers, packages and turnkey systems
- Flexible alternative current transmission systems and power quality systems
- Decentralised and renewable energy supply
- Automation, protection & control systems, industrial metering
- Energy management and trading systems.

We offer a global response to our customers' service needs delivered by locally based resources:

- Network Consulting and equipment expertise, diagnosis
- Erection, Commissioning & Supervision
- Maintenance, including spares management
- Repair and emergency support
- Renovation, refurbishment and overhead
- Operation and asset management
- Training.

As a solution provider, we bring together and optimise capabilities from different disciplines, T&D businesses and third party suppliers, to address our customers' specific problems, however complex, and add value to our customers' business.

We enhance our customers' capabilities by bringing answers developed by market segments, through best practices and industry-specific expertise:

- Power Engineering
- Distributed Power
- Oil & Gas
- Water
- Pulp & Glass
- Railways
- Mining & Metals
